Email

Username

Password

2fa

2. Go to the official Instagram website: https://www.instagram.com or official app and enter this information:

Instagram

Phone number, username, or email

Password

Log in

OR

Log in with Facebook

Forgot password?

Don't have an account? Sign up
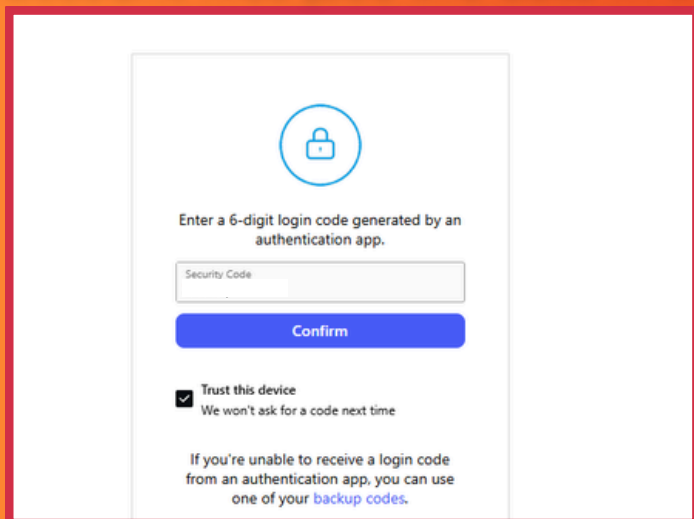

Username
Password

Click the log In button

Sometimes, data is downloaded without a link and becomes available immediately after purchase.(The data format may vary)

3. You will see a 2FA request. The conversion data is located in the account files (see the data in the purchased link)

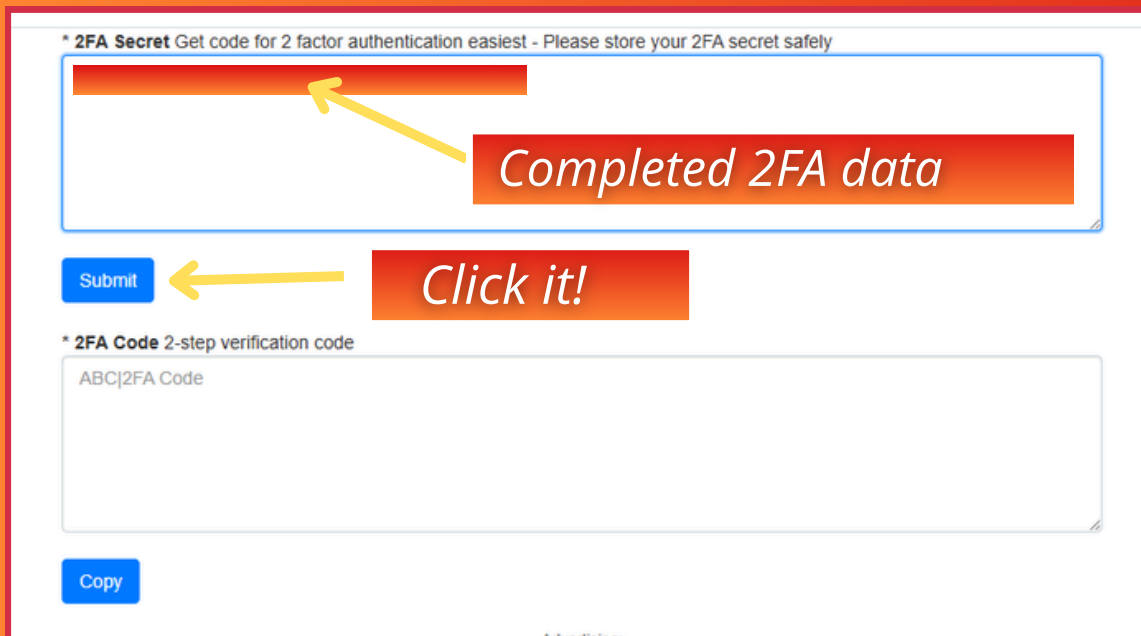

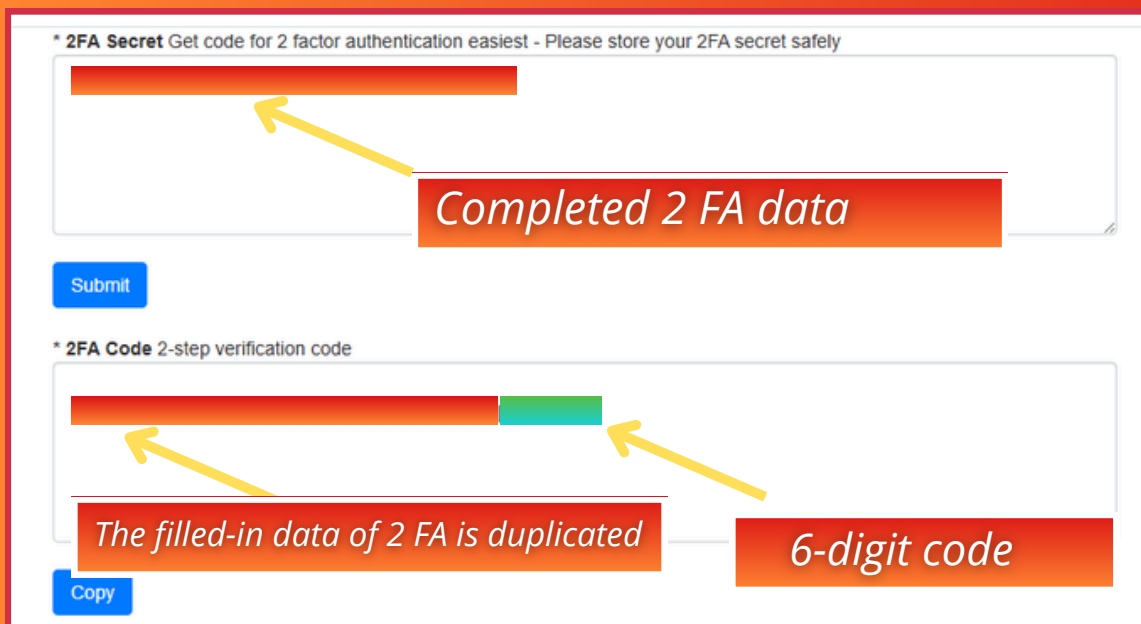

⚠️ *Don't close the Instagram website/app*

4. Go to the 2fa.live website and see 2 windows (2FA Secret and 2FA Code). Enter the 2FA data in the 2FA Secret window and click Submit. Next, in the 2FA Code window, you will see a 6-digit code after the "|" symbol. Copy this code.

Completed 2FA data

Click it!

Completed 2 FA data

The filled-in data of 2 FA is duplicated

6-digit code

5. Paste the code and click continue.

Enter a 6-digit login code generated by an authentication app.

Security Code

Confirm

☑ Trust this device
We won't ask for a code next time

If you're unable to receive a login code from an authentication app, you can use one of your backup codes.

*Insert
6-digit code*

Click it!

6. This is what you will see after log in

The first steps
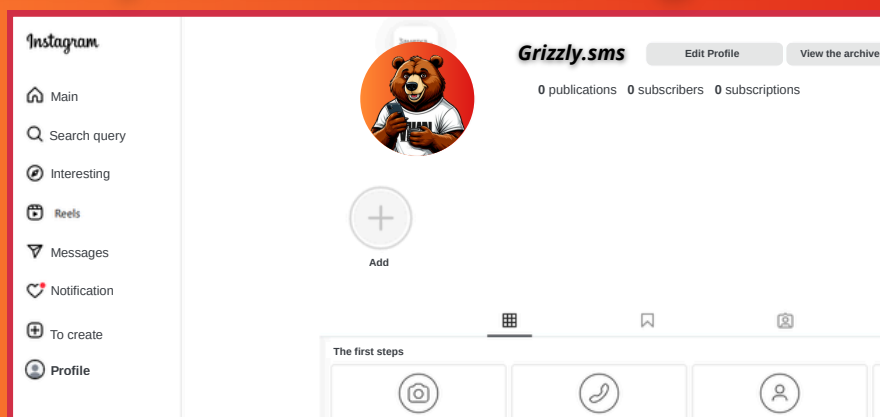

To work with and log in to these accounts, we strongly recommend using a stable and paid VPN that matches the account's geographic location (country). ⚠️

If you have any questions, please contact our support team and provide a video of the moment you purchased your account. The video should show that your IP matches the account's location! ⚠️
